The principal objective of the Network Performance Engineering handbook is to bring together technical contributions and future research directions in the performance engineering of heterogeneous networks and the Internet by eminent researchers and practitioners from industry and academia worldwide.

Network Performance Engineering: A Handbook on Convergent

Not every use case will be critical to performance. The 80-20 rule applies here: A small subset of the use cases (20%) accounts for most of the uses (80%) of the system. The performance of the system is dominated by these heavily used functions. Thus, these should be your first concern when assessing performance.
