

nonlinear and stochastic dynamics pdf

A classic, extensively studied nonlinear problem is the dynamics of a pendulum under the influence of gravity. Using Lagrangian mechanics, it may be shown that the motion of a pendulum can be described by the dimensionless nonlinear equation $\ddot{\theta} + \sin \theta = 0$ where gravity points "downwards" and θ is the angle the pendulum forms with its rest position, as shown in the figure at right.

ANSYS AUTODYN Explicit Software for Nonlinear Dynamics

Chaos theory is a branch of mathematics focusing on the behavior of dynamical systems that are highly sensitive to initial conditions. "Chaos" is an interdisciplinary theory stating that within the apparent randomness of chaotic complex systems, there are underlying patterns, constant feedback loops, repetition, self-similarity, fractals, self-organization, and reliance on programming at the ...

Chaos theory - Wikipedia

We investigate a small vortex-lattice system of four co-rotating vortices in an atomic Bose-Einstein condensate and find that the vortex dynamics display chaotic behaviour after a system quench introduced by reversing the direction of circulation of a single vortex through a phase-imprinting process.

AN ECONOMETRIC CHARACTERIZATION OF BUSINESS CYCLE DYNAMICS

Systems Simulation: The Shortest Route to Applications. This site features information about discrete event system modeling and simulation. It includes discussions on descriptive simulation modeling, programming commands, techniques for sensitivity estimation, optimization and goal-seeking by simulation, and what-if analysis.

The Journal of Mathematical Analysis and Applications presents papers that treat mathematical analysis and its numerous applications. The journal emphasizes articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, and engineering, particularly those that stress analytical aspects and novel problems and their solutions.

Journal of Mathematical Analysis and Applications

Journal of Coupled Systems and Multiscale Dynamics (JCSMD) is an international, peer-reviewed interdisciplinary journal that provides a unique publication forum for addressing challenges and new emerging problems in the study of coupled systems, their dynamics, as well as associated phenomena and processes.

Exponential stability criterion for time delay systems with nonlinear uncertainties

Applied Mathematics and Computation | ScienceDirect.com

CPAA publishes original research papers of the highest quality in all the major areas of analysis and its applications, with a central theme on theoretical and numeric differential equations.

American Institute of Mathematical Sciences

Journal of Risk and Financial Management (ISSN 1911-8074; ISSN 1911-8066 for printed edition) is an international peer-reviewed open access journal on risk and financial management. JRFM was formerly edited by Prof. Dr. Raymond A.K. Cox and published by Prof. Dr. Alan Wong online in one yearly volume from 2008 until end 2012. Since October 2013, it is published quarterly and online by MDPI.
