Argo is an international program that uses profiling floats to observe temperature, salinity, currents, and, recently, bio-optical properties in the Earth's oceans; it has been operational since the early 2000s. The real-time data it provides is used in climate and oceanographic research. A special research interest is to quantify the ocean heat content (OHC).

Please review the FAQs and contact us if you find a problem.. Credits: 1. Recommended: I would consider this an easier course than the "core" science courses. Course Description: Students will study oceanography as a science from many different aspects. Chemical, physical, and geological oceanography will be explored. Students will study not only the ocean but water systems, coastlines and ...

1. Introduction " Marine heatwaves and their ecological impact. Ecosystems around the world have responded to anthropogenic climate change, with major implications for ecological goods and services (Rosenzweig et al., 2008). Links between a changing climate, shifts in species distributions, and the structure of communities and ecosystems have been documented convincingly for many taxa across ...

A hierarchical approach to defining marine heatwaves

GPA Requirement & Residency. A student must have at least a 2.0 average in all biology courses attempted and a 2.0 average in all biology courses taken at UAB in order to graduate.

The sea, the world ocean or simply the ocean is the connected body of salty water that covers over 70 percent of the Earth's surface. It moderates the Earth's climate and has important roles in the water cycle, carbon cycle, and nitrogen cycle. It has been travelled and explored since ancient times, while the scientific study of the sea "oceanography" dates broadly from the voyages of Captain ...

symposium information. Dear Friends and Colleagues, Welcome to the official website of the First International Marine & Freshwater Sciences Symposium (MarFresh2018) which will be held on 18-21 October 2018 in Kemer/Antalya, Turkey. Water is crucial for all living organisms that covers almost 80% of our planet.

MARFRESH2018

Help Protect and Restore Ocean Life. Help us protect and restore marine life by supporting our various online community-centered marine conservation projects that are effectively sharing the wonders of the ocean with millions each year around the world, raising a balanced awareness of the increasingly troubling and often very complex marine conservation issues that affect marine life and ...
