Population by region. Six of the Earth's seven continents are permanently inhabited on a large scale. Asia is
the most populous continent, with its 4.54 billion inhabitants accounting for 60% of the world population. The
world's two most populated countries, China and India, together constitute about 36% of the world's
population. Africa is the second most populated continent, with around 1.28 ...

Climate-Smart Agriculture - World Bank

After the world population increased more than 400% over the 20th century, population growth has slowed considerably: The fastest world population growth rate was already reached in the late 1960s, and it has been falling since. While the world population increased by 2% annually in the late 60s it has now slowed to an increase of just about 1%.
